ABSTRACT

Fall enrollment data in institutions of higher education, 1971, were obtained from a single questionnaire. The data are compiled in tabular form according to distributing data by control and level of institution, state or other area, and individual institution. Data indicated: (1) In fall 1971, total enrollment in institutions of higher education passed the 9 million mark, a 4.3% increase over fall 1970. (2) Enrollment at public universities increased by 1.0% offsetting the 2.6% loss at private universities, and resulting in the net overall increase for all universities of 0.1%. (3) The enrollment of full-time students increased 4.5% over 1970. Women constituted 41.9% of all students compared to 41.3% in 1970 and 40.8% in 1969. (4) Enrollment in bachelor's or higher degree-credit programs increased 2.5% over like enrollment in 1970. (5) Enrollment in terminal-occupational programs increased by 26.1%. (6) Students entering college for the first time in the fall term of 1971 increased byonly 2.7% over the number of first-time student in the fall of 1970. (7) While public institutions were enrolling 4.1% more first-time students in fall 1971 than in 1970, the corresponding enrollment in private institutions dropped by 2.4%. The Appendix includes survey background material and the survey instrument. (MJM)

## FOREWORD

A single questionnaire was used in fall 1971 to collect enrollment data for institutions of higher education. The questionnaire employed was identical with the second of two enrollment questionnaires, the "supplementary information" form, used in fall 1970.

This publication represents a departure from recent reports on fall enrollment surveys in that both institutional data and summary data are contained within this single volume. Data are presented in families of tables, distributing data by control and level of institution, State or other area, and individual institution.

The assistance of college and university registrars and other officials who provided data for their institutions is deeply appreciated.

# INTRODUCTION

In fall 1971, total enrollment in institutions of higher education passed the 9-million mark for the first time, a 4.3-percent increase over fall 1970. However, this rate of increase is considerably less than the 7.2-percent increase from fall 1969 to fall 1970. Between 1970 and 1971, fall enrollment at publicly controlled institutions rose by 5.8 percent and at private institutions fell by 0.1 percent.

## Enrollment by Control and Level of Institution

Enrollment at public universities increased by 1.0 percent, offsetting the 2.6-percent loss at private universities, and resulting in the net overall increase for all universities of 0.1 percent. Other 4-year institutions averaged increases of 3.2 percent. (See page 3.) In contrast, enrollment at 2-year institutions increased by 11.9 percent in fall 1971, which was close to the 12.4-percent gain in 1970. The 12.6-percent growth of enrollment in public 2-year institutions was in sharp contrast to the 0.3-percent decrease at private 2-year schools. Inasmuch as enrollment at public institutions constituted 76.0 percent of the total, public enrollment patterns differed little from the overall totals, as shown in the following tabulation:

| Control and level of institution | 1969 fall enrollment | 1970 fall enrollment | Percent change, 1969-1970 | 1971 fall enrollment | Percent change, 1970-1971 |

## Continued Growth of Enrollment in Public 2-Year Institutions

Many different and unique factors affect the growth patterns of individual institutions, but there are a number of general reasons why enrollment in public 2-year institutions as a group continued to grow at a relatively high rate. First, the number of public 2-year institutions continued to increase substantially, from 654 in 1970 to 699 in 1971--an increase of 6.9 percent (see appendix I). Not only is it usual for these institutions to open with a rather large enrollment in their first year, but their enrollments also tend to increase rather rapidly for the following several years. Second, it is ordinarily less expensive and more convenient for a student to attend a community college within commuting distance of his home. Third, some States, by various means, are deliberately channeling students into public 2-year institutions because the expenditure per student is considerably less in the community colleges than it is in the large State universities or public 4-year colleges. Fourth, there has been a recent upsurge of interest in vocational programs, and community colleges are generally more responsive to community or area needs (e.g., to supply trained manpower to local industry) than are other types of institutions.

Other factors contribute to the persistent and relatively rapid upward climb of enrollment in public 2-year institutions, but those cited above are the ones most likely to be mentioned in any discussion of the subject.

## Sex and Attendance Status

The enrollment of full-time students was 6,132,154, an increase of 4.5 percent over 1970. Part-time students increased 3.9 percent to 2,892,877. Full-time students represented 67.9 percent of all students, up very slightly from the proportion in 1970. This increase in the proportion of full-time students represents at least a halt, if not a reversal, of the downward trend in the proportion of total enrollment accounted for by full-time students that had continued for the preceding 5 years. The gradual growth in the proportion of total enrollment accounted for by women continued in 1971, with women constituting 41.9 percent of all students. This compares to 41.3 percent in 1970 and 40.8 percent in 1969.

## Bachelor's or Higher Degree-Credit Students

Enrollment in bachelor's or higher degree-credit programs was 8,188,169, an increase of 2.5 percent over like enrollment in 1970. Among the several levels of degree-credit enrollment, the greatest relative increase (11.1 percent) occurred in first-professional degree programs. This is also the category of enrollment in which the ratio of men to women is the most disproportionate, men accounting for 90.3 percent of the 193,953 total. From this small base the enrollment of women first-professional students increased by 25.9 percent in fall 1971, compared to 9.7 percent for men. In direct contrast to first-professional degree programs, graduate degree programs experienced a decline in enrollment--which was greater for men (3.1 percent) than for women (1.6 percent). Resident bachelor's degree-credit undergraduate students increased by 3.8 percent from 1970 to 1971, lower division students by 3.2 percent and upper division by 5.0 percent. Extension bachelor's degree-credit undergraduates decreased by 4.1 percent, as shown in the following table:

| Bachelor's Degree-Credit Undergraduate Students | 1969 fall enrollment | 1970 fall enrollment | Percent change, 1969-1970 | 1971 fall enrollment | Percent change, 1970-1971 |
|---|---|---|---|---|---|
| TOTAL | 6,019,286 | 6,319,955 | +5.0 | 6,547,423 | +3.6 |
| Resident students | 5,878,257 | 6,173,340 | +5.0 | 6,406,848 | +3.8 |

| Extension students | 141,029 | 146,615 | +4.0 | 140,575 | -4.1 |

Resident degree-credit students reported as "unclassified," who were estimated to be enrolled primarily at the undergraduate level, decreased by 0.2 percent over 1970. "Unclassified" extension students decreased by 18.7 percent, as indicated below:

## Terminal-Occupational Enrollments

In contrast to the relatively small increase in the enrollment of bachelor's degree-credit undergraduate students, enrollment in terminal-occupational programs (non-bachelor's degree-credit) increased by 26.1 percent to 836,862. Unfortunately, this reporting is not consistent from year to year, even at the same institution, so it is quite possible that some small part, at least, of the increase in 1971 resulted from year-to-year inconsistencies in reporting. These inconsistencies stem largely from the fact that students in terminal programs are often able to transfer to 4-year institutions, obtaining bachelor's degree-credit for many of their vocational courses. Therefore, these students are frequently reported as bachelor's degree-credit students. These inconsistencies notwithstanding, men students in terminal-occupational programs increased by 20.4 percent over 1970, 4 percentage points lower than the 24.4-percent increase from 1969 to 1970. The number of women enrolled in such programs increased by 35.1 percent over 1970, 4 percentage points greater than the increase from 1969 to 1970.

Two-year institutions enrolled 90.9 percent of the national total of terminal-occupational enrollments in 1971, an increase of 28.2 percent over 1970. This was substantially greater than the 11.9-percent increase in total enrollment in 2-year institutions over the same period. In 4-year institutions, the enrollment of terminal-occupational students increased by 8.0 percent in 1971, following a decrease of 5.9 percent in 1970. For all institutions combined, students enrolled part-time in these programs constituted more than half the enrollment (51.8 percent), having increased by 29.2 percent over fall 1970 enrollment; full-time students increased by 22.9 percent over 1970.

## First-Time Students

Students entering college for the first time in the fall term of 1971 increased by only 2.7 percent over the number of first-time students in the fall of 1970. The number of men who were enrolled in college for the first time increased by only 1.6 percent, down from the modest increase of 2.9 percent in 1970. Women in college for the first time in the fall of 1970 showed a more substantial increase of 4.0 percent, but this, too, was down from the rate of increase in 1970 (7.3 percent).

While public institutions were enrolling 4.1 percent more first-time students in fall 1971 than in 1970, the corresponding enrollment in private institutions dropped by 2.4 percent. This loss in the private sector was accounted for by decreases of 4.1 percent in universities and 2.3 percent in other 4-year institutions. Private 2-year colleges held their own, with a gain of less than 0.1 percent.

The decrease in the enrollment of first-time students in 4-year institutions was not limited to the private sector: Public universities lost 1.3 percent and other 4-year institutions, 3.2 percent. Virtually all gains in the enrollment of first-time students in fall 1971 are attributable to public 2-year institutions, which enrolled 9.8 percent more first-time students in the fall of 1971 than in 1970--and even this increase did not keep pace with the 12.6 percent increase in total enrollment in public two-year institutions.

## Full-Time-Equivalent Enrollment

Participating institutions were asked on the 1971 form to provide full-time-equivalent (FTE) enrollment for the total headcount enrollment reported in each category. Respondents were given the option of using institutional FTE enrollment figures already calculated, or of computing them by the "adjusted headcount method" suggested on the form. Further, the "adjusted headcount method," in which each full-time student is counted as one (1.0) full-time equivalent and each part-time student as one-third (1/3) full-time equivalent, was automatically applied during the tabulation procedure for any report forms on which FTE enrollment data had not been provided by the institutions.

In the 1970 survey, many institutions encountered difficulty in providing FTE enrollment data. Therefore, reported FTE enrollment data were not used that year, but computer-generated FTE enrollment data, based on the "adjusted headcount method," were used for all institutions. The fall 1971 FTE enrollment statistics presented in this report consist primarily of those reported by the institutions themselves. Computer-generated FTE data have been provided for a few institutions that did not report FTE enrollments. Detailed FTE enrollment figures in many cases do not equal the totals shown. This occurs because of rounding differences accumulating from fractionated FTE enrollment figures.

However, these rounding differences are small, and should in no way impair the usefulness of the data.

The table below presents 1971 fall enrollment data in terms of both headcounts and full-time equivalents. One set of FTE enrollment figures are those reported largely by institutions and supplemented by computer-generated figures. The other set of FTE enrollment figures was calculated, for comparison, according to the "adjusted headcount method"; that is, the number of full-time students plus one-third the number of part-time students.

Comparison of the two methods of arriving at full-time equivalents shows the reported FTE's to be consistently but only slightly larger than computer-generated FTE's in all enrollment categories except for extension enrollments, where reported FTE's were smaller. In the grand total of all enrollments, reported FTE's were 1.6 percent greater than FTE's obtained by the computer-generated "adjusted headcount method."

[1/] Aggregate United States includes the 50 States, the District of Columbia, U.S. Service Schools, and outlying areas.

[2/] Includes students whose programs of work consist wholly or chiefly of work normally creditable toward a bachelor's or higher degree plus students in programs requiring 1, 2, or 3 years of college work which are designed to prepare for immediate employment rather than as the first 1, 2, or 3 years of a bachelor's degree program.

[3/] Readers should be reminded that although enrollment does change every year, so does the number of institutions accounting for this total enrollment. Accordingly, the numbers of institutions in each year for which enrollment data are shown in the table are as follows: 1971 - 2,617; 1970 - 2,565; 1969 - 2,536; 1968 - 2,495; 1967 - 2,382; 1966 - 2,337; 1965 - 2,238; 1964 - 2,183; 1963 - 2,140.

[4/] A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "total, all students" counts. Data for first-time students for years prior to 1966 are not comparable since they include only first-time students in programs chiefly creditable toward a bachelor's degree.

## APPENDIX I. SURVEY BACKGROUND

### Survey Population

The Education Directory, 1971-72, Higher Education (OE-50000-72) was the source for the list of institutions included in the survey on which this report is based.

Institutions of higher education included in this report are classified either as 2-year or 4-year institutions, with universities as a separate sub-classification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e.g., ecclesiastical recognition in theological institutions. They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that give considerable stress to graduate instruction and have at least two professional schools that are not exclusively technological.

The numbers of institutions in the fall 1971 survey, and for comparison, in the 1970 survey, were as follows:

| | 1971 | | | 1970 | | |
|---|---|---|---|---|---|---|
| | Total | Public | Private | Total | Public | Private |
| All institutions | 2,617 | 1,143 | 1,474 | 2,565 | 1,093 | 1,472 |
| 4-year institutions | 1,680 | 444 | 1,236 | 1,673 | 439 | 1,234 |
| Universities | 160 | 95 | 65 | 160 | 95 | 65 |
| Other 4-year | 1,520 | 349 | 1,171 | 1,513 | 344 | 1,169 |
| 2-year institutions | 937 | 699 | 238 | 892 | 654 | 238 |

For the convenience of the reader, the questionnaire used in the survey is reproduced in Appendix II of this report. Total enrollment figures for the 2,617 institutions in the survey have been entered in each cell of the questionnaire. Complete data were received for all 2,617 institutions in the survey, except for FTE

enrollment data as discussed previously.

Questionnaire Editing

Each report form filed in this survey was compared with the report form filed by each institution for the 1970 supplementary information survey, which was identical in format to the single form used in 1971. Large differences in enrollment patterns were accepted if reasons for them were readily apparent. If further information was needed, institutions were contacted by letter and/or telephone for verification, revision, or additions to the figures reported. These procedures undoubtedly eliminated many of the larger reporting errors, but the extent to which small, unrecognized errors may remain is unknown.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded but are given as they were obtained--by simple addition of the figures for individual institutions. This does not imply that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add exactly to the totals. Also, in view of the care with which the data were compiled by the respondents and reviewed by the Office of Education, it seemed appropriate that the totals reflect the individual reports.

## DEFINITIONS

**MULTI-CAMPUS INSTITUTION.** An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

**MAIN CAMPUS.** In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative offices.

**BRANCH CAMPUS.** A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

**INSTITUTIONAL SYSTEM.** A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

## DEFINITIONS

**RESIDENT STUDENTS.** Students who take their college work on main campus or on a branch campus. Living quarters *(on campus or off)* and legal domicile are irrelevant. Include resident students in both day and evening sessions.

**UNDERGRADUATES.** Students taking work creditable toward a bachelor's degree and who have not yet attained a bachelor's degree.

**LOWER DIVISION.** Freshmen and sophomores, includes students in 2-year institutions who are in "bachelor's-parallel" or "transfer-credit" programs. *(See also line 13. An entry on this line normally will require an entry on line 13.)*

**UPPER DIVISION.** Students who have completed the sophomore year and typically are enrolled in a 4- or 5-year bachelor's degree program. *(Students in professional programs of 6 or more years should generally be included in line 05.)*

**UNCLASSIFIED STUDENTS.** Not candidates for a degree, diploma, or certificate, or equivalent award, although taking courses in regular classes with other students, this category also includes students who cannot be classified by academic level *(undergraduate, first-professional, graduate)*, as well as students with the bachelor's degree who are taking undergraduate courses *(e.g., for teacher certification)*.

**FIRST-PROFESSIONAL STUDENTS.** Students enrolled in a professional school or program which required at least two academic years of college work for entrance and a total of at least 6 years for a degree. Students in programs requiring only 4 or 5 years beyond high school should be reported as undergraduates. All students enrolled in work leading toward a master's degree are to be reported as GRADUATE.

**GRADUATE STUDENTS.** Students who hold the bachelor's or first-professional degree, or equivalent, and are taking work at the graduate level.

**EXTENSION STUDENTS.** Extension students are not defined uniformly in all institutions. Most commonly it means face-to-face instruction in centers or places away from the main campus or branch campuses. It may also include on-campus instruction offered by an extension division. Extension centers differ from branch campuses in that students are not counted as resident students. Note that only credit extension enrollment is requested *(i.e., enrollment in courses creditable toward a degree, diploma, certificate, or other formal award)*. Enrollment in interest courses, short courses, noncredit adult education courses, and other community-type programs not creditable toward such an award are to be excluded even though they may be offered under the auspices of the extension division.

**FIRST-TIME DEGREE-CREDIT STUDENTS.** Students included in line 12 above who are entering an institution of higher education for the first time in Fall 1972, and who have not previously attended any other institution of higher education. Exclude transfers.

**NON-BACHELOR'S-DEGREE-CREDIT STUDENTS IN ORGANIZED OCCUPATIONAL PROGRAMS OF LESS THAN FOUR YEARS, NOT CHIEFLY CREDITABLE TOWARD A BACHELOR'S DEGREE.** Students in vocational and technical educational programs which are normally terminal and result in a certificate, diploma, or similar award. NOTE: Students reported in Section I should not also be reported in Section II, and vice versa.

**FIRST-TIME NON-BACHELOR'S-DEGREE-CREDIT STUDENTS.** Students included in line 16 above who are entering an institution of higher education for the first time in Fall 1972, and who have not previously attended any other institution of higher education. Exclude transfers.

PLEASE READ THESE INSTRUCTIONS AND DEFINITIONS BEFORE COMPLETING THIS FORM. DETACH THIS PORTION AND MAIL COMPLETED FORM TO U.S. OFFICE OF EDUCATION.

Please proofread the completed report before returning it to the U.S. Office of Education. DO NOT return only partially completed forms.

## INSTRUCTIONS

*NOTE: Listings of data for individual institutions are regularly included in published reports of this survey.*

This questionnaire form is identical to the one used for fall 1971. If you need clarification on any item, please call Mr. George H. Wade, U.S. Office of Education, (202) 962-7301, in Washington, D.C.

If exact counts are lacking for a group that should be reported, please include an estimate for that group.

Do NOT fill out separate forms for EXTENSION CENTERS. Extension students should be reported on the form for the main campus

PLEASE COMPLETE THIS FORM as soon as detailed enrollment breakdowns are available, but no later than November 1, 1972.

Do NOT include in this report:

*(a)* Students in noncredit adult education courses.
*(b)* Students taking courses at home by mail, radio, or television.
*(c)* Students enrolled only for "short courses."
*(d)* Auditors.
*(e)* Students studying abroad.
*(f)* Students in any branch campus or extension center in a foreign country.

Please enter in column (6), on the appropriate lines, the full-time equivalents which you may have already calculated for any of the corresponding headcount totals in column (5). If you have not previously calculated full-time equivalent enrollment, the following method is suggested.

> ADJUSTED HEADCOUNT METHOD. Full-time equivalent enrollment equals the headcount of full-time students plus one-third the headcount of part-time students.

You may use the above method or any other method of calculating full-time equivalent enrollment most appropriate and/or convenient to your institution. If you do not calculate full-time equivalent enrollment figures, the U.S. Office of Education will make the calculations, using the "Adjusted Headcount Method."
